### **2000Charge Adds EuroDebit® Processing for Belgium**

With the addition of Belgium to the existing EuroDebit® solution, 2000Charge® takes a major step providing merchants the benefits of the Single Euro Payments Area initiative and eliminating the difference between national and intra-European cross border payments.

EuroDebit® targets your potential European customers who do not own a credit card or those who are reluctant to make purchases with their credit card online. With each transaction the funds are directly withdrawn from your customers' bank account in a safe and efficient manner.

The EuroDebit® solution automatically includes benefits such as instant approval, recurring billing, cross-sell, up-sell, fraud screening, user verification, and customer support. EuroDebit® is part of the "ALTERNATIVE PAYMENTS" smart button product lineup, which provides our merchants with all domestic payment solutions through one button, so integration is simple.

Founded in 1999, 2000Charge® has provided web-based merchants with Alternative Payment solutions, allowing them to accept payments from all over the world in safe and convenient manner. For more information, including a complete list of alternative payment methods provided, please visit [www.2000Charge.com](http://www.2000Charge.com) or call (626) 585-1814 and speak with an expert account manager to open up your business to new revenue streams!
